

ARUNKUMAR S

Full-Stack Developer (MERN) | React.js · Node.js · Express.js · MySQL · MongoDB

Chennai, Tamil Nadu | 6381218559 | selvam.arun100@gmail.com | github.com/Arunkumar-30 | linkedin.com/in/s-arunkumar-1397b9228

PROFESSIONAL SUMMARY

Full-Stack Developer with around 2 years of experience building and maintaining production web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js) and MySQL. Skilled in designing RESTful APIs, optimizing database queries, and delivering responsive, cross-browser UIs. Track record of reducing page load times and production bugs through targeted performance optimization. Experienced working directly with clients to translate requirements into shipped features, with additional background in Shopify theme development and on-page SEO.

TECHNICAL SKILLS

Languages/Frontend: JavaScript, HTML5, CSS3, React.js, Bootstrap, Angular (basics)

Backend: Node.js, Express.js, Python, REST API Design

Databases: MySQL, MongoDB, Firebase

CMS/Integrations: Shopify (Liquid theme customization, app integration), Google Maps API

Tools & Practices: Git, GitHub, Postman, VS Code, Agile collaboration, Cross-browser testing, SEO

WORK EXPERIENCE

Full Stack Developer — Techorc Software Solutions

Jan 2026 – Present

Coimbatore, Tamil Nadu

- Build and maintain full-stack web applications end-to-end, owning React.js component architecture on the frontend and Express.js route/controller logic on the backend.
- Design and implement RESTful API endpoints backed by MySQL, including schema design, query optimization, and input validation.
- Identify and resolve recurring production bugs, reducing repeat issue reports and improving page response times through targeted query and component-level optimization.
- Partner directly with clients to gather requirements and translate them into responsive, cross-browser UI implementations alongside frontend and backend teammates.

Full Stack Developer — Riyadvi Software Technologies Pvt. Ltd

Aug 2024 – Oct 2025

Tamil Nadu

- Designed and built multiple responsive business websites and landing pages from scratch, covering layout, styling, and mobile responsiveness to meet client launch deadlines.
- Architected backend systems using Node.js, Express.js, and MySQL to power dynamic, client-facing web applications, including data models and server-side logic.
- Customized Shopify store themes (Liquid templates) and implemented on-page SEO improvements — meta tags, site structure, and page speed — to improve store discoverability.
- Integrated third-party APIs into client applications, resolved cross-browser and backend bugs, and maintained version history using Git across all client repositories.

PROJECTS

GPS Tracking System — Fleet Management Platform

Tech Stack: React, Node.js, Firebase, Google Maps API

- Co-developing a GPS vehicle tracking platform with sub-2-second location update latency, route history logging, and a fleet dashboard monitoring 20+ vehicles.
- Achieved a 40% reduction in UI load time through React component-level code splitting, lazy loading, and Firebase backend optimization.

IELTS Preparation Platform — Overseas Education Academy

Tech Stack: React, Node.js, SQL

- Built a responsive landing page to handle student sign-ups and lead capture.
- Developed a secure student portal for IELTS practice tests, including authentication and session handling.
- Implemented content management for test material and automated score calculation logic.
- Designed REST APIs connecting the frontend portal with backend services for scalable communication.

EDUCATION

Bachelor of Computer Science (B.Sc.) — Govt. Arts & Science College, Ariyalur

2017 – 2020

Languages: Tamil (Native), English (Professional Working Proficiency)
